

Deploy an operational model of compliance and risk governance of your AI Systems

First AIMS® on the market, Naaia is the centralised governance solution that converts regulatory obligations into actions to achieve compliance targets quickly and efficiently.

Artificial intelligence (AI) is becoming a strategic imperative for companies growth

Whether it's advanced data analysis, process automation, decision support or personalised customer experience, this cutting-edge technology offers significant advantages in terms of operational efficiency, innovation and adaptation to market evolutions.

Providing a framework for the implementation of AI

The rise of AI also presents **new challenges for businesses**, which must not only ensure that their **AI systems (AIS)** operate reliably and efficiently, but also that they comply with regulatory and ethical standards in an ever-changing landscape.

In a context where **regulations are accelerating** on a European and global level (**adoption of the AI Act**, Executive Order to regulate artificial intelligence in the United States, regulations on generative AI in China, etc.), companies need to build and drive a strong and operational **strategy for governance, risk-management and compliance.**

77%

of companies confirm that future AI regulation is a **priority throughout the company.**

(Barometer of data management 2024 study, Capgemini Invent)

66%

of executives do not offer AI training to their employees.

(Splunk Study, March 2024)

25%

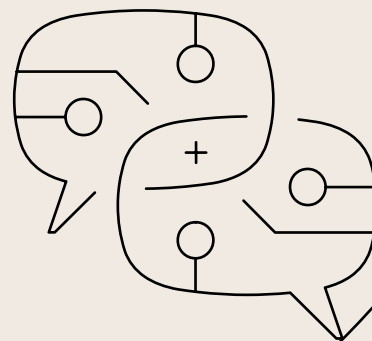

only of **corporate management** has begun to set up actions to **anticipate regulations.**

(Barometer of data management 2024 study, Capgemini Invent)

Naaia : value-based compliance management

At Naaia, we have developed the market's first **AIMS®** (AI Management System) solution to provide an **operational model** for compliance and risk management of AI Systems (AIS) and models to **transform regulatory obligations into actions** throughout all **existing regulations worldwide**.

Find out more about our **solutions to accelerate** the adoption of a high-performant and responsible AI aligned with compliance and your **strategic objectives**.

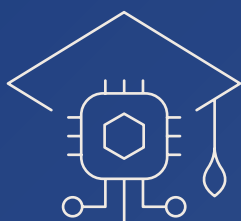

Naaia is the compliance and risk management solution for your AI products, throughout their lifecycle.

It is the result of the commitment of an expert team, convinced that companies should not have to choose between innovation and compliance.

Founded in 2021 by four entrepreneurs, including three lawyers specialising in the digital transformation of regulated industries, Naaia provides an operational response to the need for accelerated compliance.

Our main purpose is to help businesses reconcile trust, performance and compliance to accelerate the adoption of AI. We provide a comprehensive solution with an end-to-end SaaS platform, business services and learning services.

About AI Management Systems (AIMS®)

AI Management Systems play a crucial role in a proactive approach to **AI governance**, helping to ensure compliance with **current standards**. The term refers to a set of rules, processes and tools designed to supervise, control and optimise AI technologies within an organisation. **The main objective is to ensure the responsible and effective development, deployment and use of these technologies.** AIMS® is a registered trademark of Naaia.

The solution in a nutshell

Our offer

A SaaS platform with four core functional modules for global, integrated management and an LMS

Repository

Lists all the company's AI Systems.

Qualification

Qualify your AI Systems for accurate mapping.

Action plan

Generates a unique action plan for each qualified AI System, incorporating regulations, industries best practices and customers standards.

AI Vigilance

Allows you to track all events related to the lifecycle of AI Systems for effective risk management in line with the AI Act's post-marketing monitoring obligations.

Learning

An LMS completes these 4 modules to train your teams on AI, compliance and the use of the platform, meeting the AI Literacy obligation.

Consulting services to optimise the value of our solution at every step

1

Once you get started, a **Functional Consultant** will guide you every step of the way to best use and implement the solution.

2

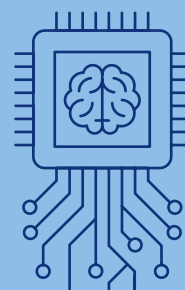

Throughout the period of use, a dedicated **Customer Success Consultant** will help your teams deep dive on the compliance and AI governance topics and facilitate the knowledge transfer.

3

Our expertise also includes **Strategic consulting** for the implementation of governance mechanisms covering all aspects of your AI governance strategy.

Personalised training for an in-depth and continued understanding of AI and its regulatory framework

In addition to the **e-learning courses** available on our LMS, we offer **starter sessions** on site or by videoconference for C-levels and business decision-makers, as well as **regular sessions** to keep abreast of regulatory developments and new standards.

Our operational promise

1 Reach the compliance target faster

2 Manage responsibilities

3 Anticipate regulatory obligations

4 Shift from simple usage to expertise

5 Maintain compliance at all times

6 Focus on your core business

Why choose Naaia ?

Multilingual, multi-regulation global solution covering all current and future European and global regulations (AI Act, US Executive Order, Generative AI regulations in China, etc.).

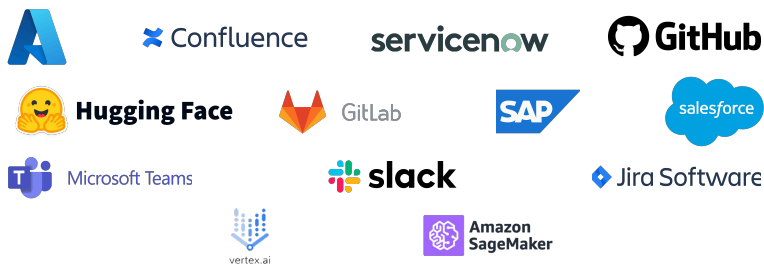

Proactive regulatory watch : Thanks to international intelligence and continuous updates, we provide you with the right tools to ensure compliance with the latest worldwide regulations, with rapid integration into our platform.

Interoperable : Designed to natively integrate into your existing infrastructures through plug-in or API, Naaia is interoperable with the main solutions on the market.

Trusted solution with legal intelligence : Our platform incorporates advanced legal expertise and its content is validated by an expert law firm. Naaia is an active member of Impact AI, Hub France IA, Numeum and the IAPP. Naaia has been awarded the Platinum badge in the Cybervadis certification.
