

The trusted solution for your AI governance

The Naaia platform turns responsible AI into action by centralizing compliance and risk management.

Naaia is certified

The operational challenges of trustworthy AI

REGULATORY CHALLENGES

- **Acceleration of AI regulation worldwide:** Across the globe, AI-related regulations are rapidly increasing, including the AI Act, U.S. state laws (California, Colorado...), Chinese regulations, the Basic AI Law in South Korea...
- More than **75 countries involved in legislative processes today**

GOVERNANCE CHALLENGES

- **Map all AI products within the organization** (in-house developments, off-the-shelf solutions, customized models)
- Organize **evaluation and monitoring processes** throughout the AI lifecycle
- Prioritize and align **regulations and standards**
- Streamline team efforts to move fast and efficiently

UNIVERSAL CHALLENGES

- **Economic competitiveness**
- **Protection of intellectual property**
- **Environmental impact**
- **Cybersecurity**
- **Sovereignty**

of CEOs only admit to being extremely confident in their AI governance

(Dataiku/Harris Poll 2025 survey)

legislative procedures related to AI worldwide

(2025 Stanford AI Index Report)

of executives only say they derive significant value from AI

(BCG AI Radar 2025)

“ By 2028, enterprises using AI governance platforms will achieve **30% higher customer trust ratings** and **25% better regulatory compliance scores** than their competitors. ”

(Gartner, Top Strategic Technology trends 2025)

The Regulatory-Ready Solution

Naaia is the first AIMS® (AI Management System) built to enable value-driven AI compliance with an intuitive, automated, and scalable platform. Through a multi-regulation, multi-framework approach, **Naaia makes compliance simple, operational, and accessible** to all stakeholders, for organizations to establish robust AI governance.

REGULATORY FRAMEWORKS

AI ACT

California Bill

AI Laws

Basic AI Law

SDAIA Ethics Principles

+ all AI regulations worldwide as soon as they come into effect

NORMS & STANDARDS

ISO 42001

AI Risk Management Framework

AI Framework

+ upcoming harmonized European norms

CUSTOMER FRAMEWORKS

AI Ethics Charters

Cybersecurity Policies

Risk Management Best Practices

Integration of validation gates from customers' internal frameworks

Naaia serves 3 key operational objectives :

01 Scale AI Governance:

- Inventory of all AI products (generative or not, in-house or off-the-shelf)
- Creation of workflows for responsible and aligned AI
- Granular risk management and alert mechanisms

02 Simplify and support regulations and standards compliance:

- Concrete, product-specific action plans
- Storage of compliance evidence within the platform
- Full traceability of AI products
- Continuous compliance monitoring and rapid response to regulatory and standards changes

03 Measure performance:

- Governance and compliance KPI dashboard
- Integration of third-party solution data via API into customizable dashboards

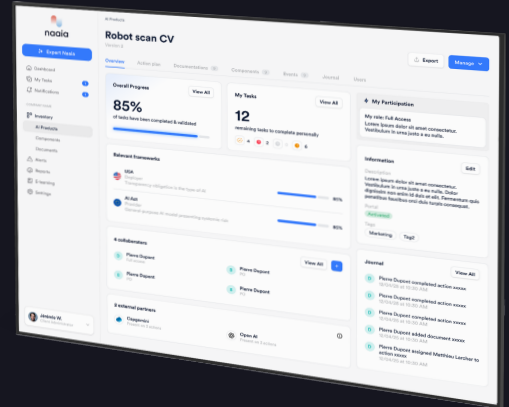

Our SaaS platform

Naaia accelerates compliance target achievement and enables you to implement **ethical and aligned AI** from the design phase of your projects. Naaia relies on **4 key modules and advanced workflows** to mitigate risks and simplify regulatory compliance for AI products.

01 Naaia Repository

Inventory all your AI systems for a complete and clear overview

Naaia Assess

Qualify your AI systems according to the applicable frameworks and assess the associated risks

02

03

Naaia Core

Get a unique operational action plan for each AI product, including templates, mutualized actions, and the ability to manage at the obligation level

Naaia Event Tracker

To meet the AI Act's requirements for post-market monitoring and to prevent any risks in real time.

04

An optimized Tech Stack

To offer a solution tailored to each client, Naaia is built around complementary technological components:

Use of the platform in standalone mode with manual inventory, qualification, and action plan generation.

Manual import

Naaia Platform

API

AI Agents

Activation of autonomous AI agents to accelerate qualification and the generation of compliance evidence.

Native API integration with a wide range of market tools

Our expertise at your service

REGULATORY CONSULTING

Structure your regulatory strategies

- Targeted monitoring with **summary sheets and alerts** for key deadlines
- **Regulatory Gate** to qualify, prioritize, and efficiently arbitrate your most complex projects
- **Regulatory governance** and ready-to-deploy documentation templates

GOVERNANCE AND STRATEGY CONSULTING

Align clear and responsible AI governance with your strategic priorities

- **Development of AI governance models** and tailored roadmaps
- **Mapping of AI use cases** and oversight of AI vendors
- **Support in building** internal frameworks

STANDARDS AND NORMS CONSULTING

Identify and integrate the standards applicable to your activities and AI use cases

- **Mapping** of existing standards
- **Design of tailored programs**
- Provision of an **ISO 42001 KIT** and delivery of **training sessions**

Strengthen business adoption of AI and foster a culture of responsibility

Naaia leverages its expertise to support your teams in firmly establishing a **culture of responsible AI** by providing continuous training on the technological, regulatory, and ethical challenges of artificial intelligence, both in Europe and internationally.

Naaia Learning

An LMS platform integrated into Naaia, enriched with exclusive content designed by our experts to support users in their daily development of skills related to AI and its regulation.

Expanded access to all training content via a Single Sign-On (SSO) system, enabling all employees in your organization to benefit from a centralized and consistent learning experience.

Naaia Expert

A specialized AI Act chatbot, directly integrated into the platform, to guide your teams in understanding and practically applying the regulation, helping them quickly build mastery of compliance challenges.

Training tracks for trustworthy AI:

Custom training modules developed with our experts to promote responsible AI in a clear, practical, and business-relevant way.

Regulatory and standards awareness sessions continuously updated in line with evolving European and international frameworks.

Why choose Naaia?

Operationalized trustworthy AI

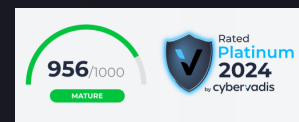

We support you **every step of the way in your responsible AI program: compliance, ethics, accountability, and risk management.** From the inventory of your AI products to the generation of compliance evidence. Enabling clear, aligned, and practical risk management.

Operational Watch

Naaia is always **up to date with the applicable AI regulations and standards worldwide**, enabling you to anticipate regulatory changes and secure your AI decisions and projects in a constantly evolving environment.

Robust and Sovereign Solution

As the first French company certified for ISO 42001, Naaia is actively committed to supporting organizations in accelerating the adoption of responsible AI, by contributing to the work of standardization bodies such as CEN-CENELEC, and by engaging with French and European institutions and authorities.

Accelerate AI adoption within organizations.
Enable innovation.
